

Electric Conveyor Dryer

The Copperhead Charge has combined the best curing technology with new innovation to create the ideal startup to medium size shop dryer that can handle all your curing needs.

The Charge's unique design can easily cure waterbase, plastisol, and DTG prints with its advanced airflow system and edge-to-edge heat chamber. Watch your productivity soar while you stay comfortable because of the Charge's Cool Skin technology that keeps the heat inside the dryer and the outside surface cool to touch. Patriot Belt™ with Sure Trak™ roller system helps to keep the belt in place. Digital belt speed readout makes it easy to duplicate conveyor dryer speed settings. Maintenance-free, brushless AC electric motor with variable-frequency drive provides reliable, accurate belt-speed control.

The dryer also includes a manual belt crank allowing operators to rotate the belt manually to remove shirts in-case of power outages. Maximize your efficiency, and handle all your curing needs with the Copperhead Charge Forced Air Conveyor Dryer.

FEATURES

- Slim design & construction
- Patriot belt™ with SureTrak™ roller system
- Available from 24 to 60" belt width & 6 to 16' heat chamber length
- Electric infrared plus forced-air curing technology for exceptional curing performance on a wide variety of inks
- Caster wheels for easy machine displacement
- Icon-based digital touchscreen control panel
- Advanced design ensures consistent temperature throughout the heat chamber
- Belt speed display reflects heat-chamber retention time, making it easy to match ink manufacturers' curing recommendations
- Real-time temperature data for consistent curing results

¹ Use uninterruptible power supply (UPS) to safeguard machine from voltage fluctuation out of main supply. If incoming voltage differs from the voltage(s) listed in the brochure, calculate amperage accordingly.

² Measured at the exhaust discharge port.

³ Static pressure.

* The mentioned requirements are for phase convertible dryer model.
